Among the industry recommendations based on the joint #APWG and #M3AAWG GDPR and WHOIS User Survey is that ICANN should establish a mechanism for WHOIS data access by accredited, vetted, qualified security actors. The results of the survey indicate that ICANN's Temp Spec for domain name WHOIS data has made it harder for anti-abuse investigators to stop new cybercrimes while these crimes are still in the preparatory stages. See other recommendations at www.m3aawg.org/rel-WhoisSurvey2018-10
